.NET Dev with over 6 years of experience working across .NET stack, from building desktop apps with WinForms to developing modern application using ASP.NET Core MVC / WinForms / WPF. Most of my works were enterprise-level business applications, both starting projects from scratch and contributing to existing ones. I have a solid understanding of how to structure and build scalable, maintainable systems that could solve real business problems.

SKILLS

- **.NET Ecosystem:** ASP.NET Core, Winforms, WPF, Entity Framework
- **Web Development:** HTML, CSS, JavaScript, REST API's
- **Languages:** C#, SQL
